Dear Mr Williams

Thank you for your valued enquiry on the range of HMC Sports Cars.

HMC Sportscars Limited, manufacturers in association with Healey Motor Company Limited, build their cars with a small team of 28 people in Stroud. The final produce is magnificent and is recognised internationally as probably the finest recreated vehicle of its type built anywhere today. HMC have managed to encompass the fabulous styling of the Austin Healey 3000 with up-to-date technology that has transformed an old classic design into a thoroughly modern projectile with build quality and engineering standards that could have only been dreamt of in the 1960's. Consequently we have a classic styled car without the normal aggravation of constant maintenance and breakdowns.

For the last ten years total production has gone to Germany, where the cars sell for well in excess of our current U.K. prices. In late 1995 we started right hand drive production and the U.K. prices start at £27,970.00 including VAT, and details of our full model line-up are enclosed.

These V8 4 Litre cars have 0-62 performance of 5.6 seconds for the Lightweight and 6.1 for the other models. All cars exceed 140mph, they are rattle and shake free, very comfortable and will accommodate extremely tall drivers. The ride is excellent due to 4-wheel independent suspension.

Quentin Willson, when reviewing the car on BBC Top Gear, lavished praise and no criticism whatsoever. Indeed Quentin suggested that other specialist sports car manufacturers should examine this car to see how the job should be done – certainly a rave review. The overriding theme of the HMC Car is **QUALITY – QUALITY – QUALITY**.

Our 'Lightweight' has just achieved 'best time of day' at Castle Coombe and our S.E. has won first place in an Aston Martin Concours.

Many cars have been built for leading industrialists and sporting personalities, each vehicle giving great pleasure and tremendous pride of ownership. Every HMC is a bespoke built machine – there is a comprehensive array of alternative specification to suit every requirement and nearly every request.

All Electric Group are currently establishing a Dealer Network around the UK for Sales and Service which should be totally in place in the next few months. All Electric are UK Concessionaires for the vehicle.

We run three Demonstrator vehicles, which can be inspected and tested either here or at a mutually agreed location. Please call me if you wish to progress your interest in our car.

Please note our new web site, operational from 1st June 1999 – www.hmc sportscars.com
Kind regards to you

Yours sincerely

John S Leek
CHAIRMAN & MANAGING DIRECTOR
