

# Fuel Economy - Used Cars

Reg No. WX53WCR

CO<sub>2</sub> emission figure (g/km)

## Fuel cost (estimated) for 12,000 miles

A fuel cost figure indicates to the consumer a guide price for comparison purposes. This figure is calculated by using the combined drive cycle (town centre and motorway) and average fuel price. Re-calculated annually, the cost per litre as at March 2025 is - petrol 139p, diesel 147p and LPG 95p. Electricity cost is 44.0p per kWh.

**£2,816**

## VED for 12 months

Vehicle excise duty (VED) or road tax varies according to the CO<sub>2</sub> emissions and fuel type of the vehicle. Cars with a list price of over £40,000 when new are subject to an additional rate per year on top of the standard rate, for five years which has not been included here.

**£430**

### \*Important Note

The fuel consumption figure shown is taken from the official test results obtained from this vehicle type when new. It is intended to provide a standard figure for comparing the relative fuel economy of different vehicles of a similar age and condition and does not represent the average fuel consumption that will be achieved on the road. A number of factors not included in the official new vehicle test will affect the fuel consumption achieved on the road including: vehicle age, how it has been maintained, road/weather conditions and driving style.
